2. RELEASE NOTES

The Release Notes further detail the corrections, changes or enhancements made to the service or product. They can also contain test results and information about the test procedure. The content is usually more descriptive compared to the Changelog. Release notes are written by a technical writer, Project Development Lead, Project Manager, or developer.

Download **LiveUpdate** and **Setup SmartLink** from the private area.

At this link, you can download instructions on how to use the LiveUpdate rev. 26 setup, which also allows you to install MainAlarmStation and the XFramework setup.
